PROFESSIONAL SUMMARY

Senior Backend Engineer with 5+ years of experience designing scalable RESTful microservices, asynchronous distributed architectures, and modern cloud infrastructure using Python, FastAPI, and PostgreSQL.

TECHNICAL SKILLS

Languages & Frameworks: Python, FastAPI, Flask, SQL, TypeScript, Node.js
Databases & Cache: PostgreSQL, Redis, SQLite, MongoDB
DevOps & Cloud: Docker, Kubernetes, AWS (S3, EC2, Lambda), GitHub Actions, CI/CD
Architecture: RESTful APIs, Distributed Systems, Microservices, AsyncIO

WORK EXPERIENCE

Senior Backend Engineer | CloudScale Tech (2022 - Present)
- Architected and deployed high-throughput backend services handling 15k req/sec using FastAPI and AsyncIO.
- Reduced database query latency by 45% through PostgreSQL indexing optimization and Redis caching layers.
- Mentored 4 junior engineers and conducted weekly design reviews.

Software Engineer | DataFlow Systems (2019 - 2022)
- Built enterprise data ingestion pipelines in Python consuming Kafka event streams.
- Designed robust automated integration testing suites with pytest, maintaining 90%+ coverage.

EDUCATION

Bachelor of Science in Computer Science | University of California, Berkeley (2015 - 2019)

PROJECTS

- Distributed Task Runner: Open-source worker orchestration framework built in Python and Redis.
- AI Search Gateway: Semantic vector search indexing service using FastAPI and embedding models.

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate (2023)
